

JWL Sandblasting Gun

Effective removal of rust, paint and dirt.

JWL Sandblasting Gun is a handy, easy to operate and powerful tool.

The JWL sandblasting Gun efficiently removes rust and ingrained dirt from various surfaces. To get started, fill the container with sand and connect the sandblasting gun to the compressor.

JWL sandblasters are ergonomically designed and therefore very user-friendly. They are light weight and easily operated. Sand quantity/suction force is infinitely adjustable and easily regulated with the trigger.

JWL sandblasting Gun is for smaller tasks.

For standard tasks:

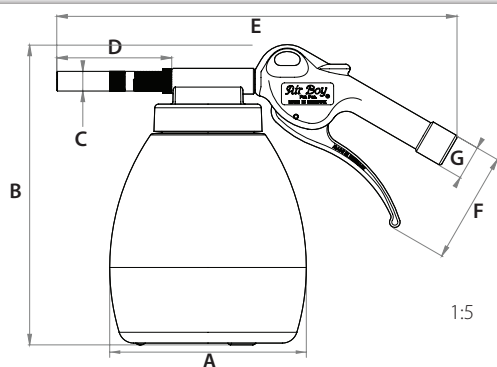

Sand grade 00 with grain size 0,3 – 0,6 mm should be used.

For more rough work:

Sand grade 0 with grain size 0,4 – 0,8 mm is ideal.

Always use P2 respiratory protection, hearing protection and eye- and facemask when blasting with sand.

NB! requires a compressor with a capacity of at least 5,5 HP / 450 l/min.

Dimensions

A	ø 130 mm	C	ø 13 mm	E	264.6 mm	G	ø 22.6 mm
B	198.2 mm	D	76 mm	F	73.6 mm		1/4 " BSP

Materials		Specifications		Accessories	Code no.
Handle and trigger	Acetal plastic	 6 - 12 Bar (87 - 174 psi)		Safety goggles and mask	145108
Valve	Acetal plastic	 minimum 450 l/min		Hardened steel nozzle with jam nut	145805
Gaskets / O-rings	Nitrile	 ~0.548 kg		Container 1,2 Litre	143200
Nozzle	Hardened steel			Container with lid 1,2 Litre	143160
Spring	Hardened spring wire
